EXHIBIT 8

Arista Help String accused by Cisco in Almeroth Exhibit Copying-6	Number of Occurrences of this String in Almeroth Exhibit Copying-6
Interface status and configuration	13
IPv6 interface status and configuration	13
IP interface status and configuration	13
Match on the %s bit	6
User using the v2c security model	4
User using the v1 security model	4
Source Ip Address	4
Show detailed information	4
Set authentication lists for logins	4
Maximum number of client connections	4
IP address of the host	4
Display detailed information	4
User using the v3 security model	3
Use the SNMPv3 noAuthNoPriv security level	3
Use the SNMPv3 authNoPriv security level	3
Use the SNMPv3 authAndPriv security level	3
Time interval in seconds	3
The UNENCRYPTED (cleartext) XMPP password	3
Specify an IPv6 access list	3
Specify a write view for the group	3
Specify a read view for the group	3
Specify a notify view for the group	3
PIM hello interval in seconds	3
IP source address	3
IP address of MLAG peer	3
Hostname or IP address of DHCP server	3
Group using the v2c security model	3
Group using the v1 security model	3
Destination Ip address	3
timeout in seconds	2
number of packets to capture	2
next hop address	2
next hop IP address	2
name of the next hop	2
engineID of the local agent	2
Use HMAC SHA algorithm for authentication	2
Use HMAC MD5 algorithm for authentication	2
Time to wait for a TACACS+ server to respond	2
Time to wait for a RADIUS server to respond	2

Time in seconds	2
The notification host's UDP port number	2
The UNENCRYPTED (cleartext) shared key	2
Text for mib object sysLocation	2
Text for mib object sysContact	2
Specify the number of retries for the server (overrides	2
Specify the number of retries for the active server	2
Specify name of the next hop	2
Show the contents of logging buffers	2
Set the IPv6 address of an interface	2
Set the IP address of an interface	2
Set priority for Designated Router election	2
Send Trap messages to this host	2
Send Inform messages to this host	2
Read-write access with this community string	2
Read-only access with this community string	2
Query response Interval in seconds	2
Privacy parameters for the user	2
Name of the load-balance profile	2
Name of the group	2
Name of the decap group	2
Interval in seconds	2
IP address of remote VTEP	2
IGMP last member query interval	2
Hostname or IP address of XMPP server	2
Hostname or IP address of TACACS+ server	2
Hostname or IP address of RADIUS server	2
Hostname or IP address of %s server	2
Erase contents of startup configuration	2
Enable proxy ARP	2
Enable IP routing	2
Authentication parameters for the user	2
Assign policy-map to the output of an interface	2
Assign policy-map to the input of an interface	2
write view name	1
read view name	1
rate in Kbps	1
query response value in deciseconds	1
options for this OSPF process	1
notify view name	1
identification of the contact person for this managed node	1
engineID of a remote agent	1

Wait time (default 5 seconds	1
Verify a file	1
VPN Routing/Forwarding Instance	1
User Datagram Protocol	1
Up to 240 characters describing this interface	1
Unique ID string	1
UDP port number	1
Turn on privileged commands	1
Turn off privileged commands	1
Transmission Control Protocol	1
Trace route to destination address or hostname	1
Trace route to destination	1
Timeout value in seconds to wait for the server	1
Time to wait for this RADIUS server to respond (overrides	1
Time in minutes	1
The remote SNMP notification host's UDP port number	1
The remote SNMP entity's UDP port number	1
The physical location of this node	1
The default authorization method list	1
The default authentication list	1
The default accounting method list	1
The HIDDEN shared key	1
Suppress routing updates on this interface	1
Suppress routing updates in an interface	1
Summary of database	1
String to uniquely identify this chassis	1
Start IP address	1
Stamp logger messages with a sequence number	1
Specify interval for load calculation for an interface	1
Specify hosts to receive SNMP notifications	1
Specify a remote SNMP entity to which the user belongs	1
Specify a RADIUS server	1
Specify Rate in packets per second	1
Specifies that an UNENCRYPTED key will follow	1
Spanning tree topology	1
Spanning Tree Subsystem	1
Source file path	1
Source address translation	1
Source MAC address	1
Show summary information	1
Show running system information	1
Show filesystem information	1

Show SNMPv3 groups	1
Show QoS Policy Map	1
Show QoS Class Map	1
Show IGMP group membership information	1
Set the system date and time	1
Set the source IP address	1
Set the metric for interface	1
Set the default domain name	1
Set syslog server logging level	1
Set key string	1
Set interface MAC address	1
Set buffered logging parameters	1
Set authentication list for enable	1
Set a static ARP entry	1
Set Hello multiplier for hold time	1
Send echo messages	1
Send community attribute to this neighbor	1
Self-originated link states	1
Select an interface to monitor	1
Select an interface to configure	1
SNMPv1/v2c community string or SNMPv3 user name	1
SNMP version to use for notification messages	1
SNMP community string	1
Router link states	1
Route map reference	1
Restrict this community to a named MIB view	1
Reset a terminal line	1
Rename a file	1
Redistribution of OSPF routes	1
Redistribute OSPF internal routes	1
Redistribute OSPF external routes	1
Redistribute OSPF NSSA external routes	1
Redistribute OSPF external routes	1
Reason for reload	1
RPF across equal-cost paths	1
Query interval in seconds	1
Query Interval in seconds	1
Print summary information	1
Prefix list name	1
Ping destination address or hostname	1
Originate default route to this neighbor	1
Open a terminal connection	1

Open a telnet connection	1
Opaque Link-Local link states	1
Opaque Area link states	1
Opaque AS link states	1
OSPF router-id in IP address format	1
OSPF area-id in IP address format	1
Number of retries to this server for a transaction	1
Number of probes	1
Number of lines on screen (0 for no pausing	1
Network summary link states	1
Network link states	1
Network Time Protocol	1
Negate a command or set its defaults	1
Name of the view	1
Name of the user	1
Name of the physical switch	1
NTP version number	1
NSSA External link states	1
Multicast Source Discovery Protocol (MSDP	1
Modify system boot parameters	1
Modify message logging facilities	1
Maximum number of routes to accept from this peer	1
Maximum number of packets (default=10	1
Maximum number of fastdrop routes	1
MIB view to which this community has access	1
MIB view family name	1
MIB family is included in the view	1
MIB family is excluded from the view	1
Log matches against this rule	1
Load interval delay in seconds	1
List files on a filesystem	1
List file information	1
Link state ID (as an IP address	1
Last member query interval in deciseconds	1
Interface specific description	1
Idle session timeout in minutes	1
IPv6 address of the host	1
IP subnet mask	1
IP routing table	1
IP multicast group address	1
IP group address	1
IP address or hostname of a remote system	1

IP address or hostname of a remote system	1
IP address of ARP entry	1
IP ARP table	1
IGMP static multicast group	1
IGMP max query response value	1
IGMP last member query count	1
IGMP host query interval	1
ICMP message type	1
ICMP message code	1
Hostname or IP address of remote SNMP notification host	1
Hostname or IP address of Collector	1
Hello interval value	1
Hello Multiplier Value	1
Halt and perform a cold restart	1
Group using the User Security Model (SNMPv3	1
Group to which the user belongs	1
Forwarding router's address	1
File to display	1
File to be deleted	1
External link states	1
Exit from configure mode	1
Enter the size of the buffer	1
Enter configuration mode	1
End of range	1
End IP address	1
Enable logging to all supported destinations	1
Enable client to client route reflection	1
Enable VmTracer on this interface	1
Enable SNMP; set community string and access privs	1
Distribute a default route	1
Distance for local routes	1
Distance for internal routes	1
Distance for external routes	1
Display the system clock	1
Display the session command history	1
Display the current privilege level	1
Display the contents of a file	1
Display current working directory	1
Display OSPF router IDs as DNS names	1
Directory or file name	1
Detailed interface information	1
Destination file path	1

Destination address translation	1
Destination MAC address	1
Description of the interactive help system	1
Delete all multicast routes	1
Delete a file	1
Delete IGMP group cache state	1
Define an administrative distance	1
Define an SNMPv2 MIB view	1
Define a user who can access the SNMP engine	1
Define a User Security Model group	1
Default domain name	1
DHCP server status and configuration	1
Current operating configuration	1
Copy from one file to another	1
Control distribution of default information	1
Contents of startup configuration	1
Configure the default domain name	1
Configure peer as a route reflector client	1
Configure logging for interface	1
Configure load balancing	1
Configure from the terminal	1
Configure a local or remote SNMPv3 engineID	1
Configure QoS Service Policy	1
Configure QoS Policy Map	1
Configure QoS Control-plane Service Policy	1
Configure QoS Class Map	1
Configure IP address summaries	1
Clear the session command history	1
Clear MAC access list counters	1
Clear IPv6 access list counters	1
Clear IP access list counters	1
Class of service	1
Class Map Name	1
Change current directory	1
Border and Boundary Router Information	1
BGP router-id in IP address format	1
An ordered list as a regular-expression	1
Always advertise default route	1
Advertising Router link states	1
Advertising Router (as an IP address	1
Administratively shut down this neighbor	1
Administrative distance for this route	1

Access list summary	1
ASBR summary link states	1
ARP type ARPA	1
AAA group definitions	1
A regular-expression to match	1
48-bit hardware address of ARP entry	1
32-bit tag value	1
